

Objet30 Prime

Put maximum flexibility on your desktop.

The world's most versatile desktop 3D printer, the Objet30 Prime™ packs specialized materials and a range of print modes into a quiet, easy-to-use system. These capabilities give you the power to 3D print the part you need, when you need it — and a different part tomorrow.

The most desktop material options: Small design and engineering teams can meet diverse material needs such as transparency, flexibility and biocompatibility in-house. The Objet30 Prime offers: rigid materials in multiple opaque shades as well as clear, for beautiful detail visualization and prototypes that include see-through components; Rubber-like materials for soft-touch features and flexible components; and specialized materials such as High Temperature, Simulated Polypropylene and even Bio-compatible for medical device prototyping and production parts such as surgical guides.

Three print modes: Make the most of your 3D printing resources with a print mode for every phase of development. From draft models that conserve time and material when you need to think fast in 3D, to beautiful, detailed client models and production parts, the Objet30 Prime delivers right from your desktop.
